AUGUST 2014

Field Day 2014 a Splashing Good Time

The DMRAA's 2014 Field Day is in the books. A wee bit of precipitation was overcome with just a bit of preparation. In other words rains caused a little extra work but in no way dampened the spirits. The wet weather was well forecasted and preparations were made to cover all areas (no pun intended)!

These preparations included a canopy for the two Honda generators and copious grounding for electrical and the towers. Of course the important issue of food was well handled with a great smoked brisket supper as well as numerous pot luck items. The numbers were up this year,

Saturday evening serenity

including waist sizes. A full report is shown on page 11.

Field Day is a significant undertaking, requiring many hours of planning and efforts by many good folks. Trailer towers, equipment, food and generators had to be hauled to Fort Des Moines County Park. Thirty hours later they all needed to cleaned, repaired and returned. The club would like to thank all involved in making this happen. Please consider joining the Field Day team next year.

Thanks to all who participated. See you next year!

Come enjoy the **fellowship**

> **DMRAA** meetings are the 4th Tuesday of the month. Be sure and mark your calendars!

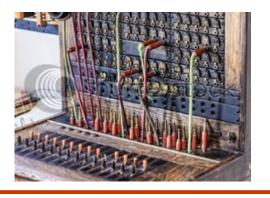

Upcoming Meetings

August 26th 7:00 PM **Plymouth Congregational Church** 42nd & Ingersoll **Recital Hall** Larry, KAØFTO

"Everything I know about Digital Carrier as used by the Bell Telephone Companies"

The August meeting will feature this presentation by Larry KAØFTO

September Meeting Fox Hunt presentation. 23rd of September, 7:00pm

Future Meetings

Tom, NØVPR is looking for meeting ideas and presenters. Please feel free to make suggestions and offer to help with a presentation

You can Help?

Are you interested in helping the club? There are ,many ways you can help — assisting with an event, taking a few pictures or even writing a piece for this newsletter.

The July meeting was the annual Show & Shine extravaganza. The highlight of the evening was the demonstration and investigation of two brand new law enforcement vehicles. We were able to see the latest in Iowa State Patrol cars. Lt. Adam Buck ISP 94 represented the patrol and offered many valued observations. Dave Lockard.

July Meeting

Not everyone was behaving

KAØVWV, with the Des Moines PD was able to show us the newest PD car, complete with license plate recognition cameras and LED lighting options. We are fortunate to have a great relationship with these organizations. We thank them for their time.

Giving back through community service

Scott Kirstien NØOOD Polk County ARES EC 515 490-7414 (cell) n0ood@arrl.net

Polk County ARES

Usually one of the best parts of serving as the Emergency Coordinator for Polk County ARES is the opportunity to write these words for the Static Sheet. I say ordinarily because, this issue has me stumped. Faced with "writer's block" I turned to the latest issue of QST (the Public Service issue).

No, I'm not going to give you a book report on the magazine (although there are some interesting articles). Instead, I thought I would talk a little bit on the concept of "Public Service."

We do what we do through ARES for the benefit of other organizations. Obviously the race or walk organizers, the other non-profit organizations, and government agencies we work with are receiving direct benefit from our training and skill set. Additionally, each time we work together as a group, we become better at our "job" - being communicators.

My approach to any of the events we participate in is that of service. When I am approached by an organization with a new event, I ask myself a few questions before I agree to help them. "How does the organization benefit by utilizing amateur radio?" As any kid will tell you, "we have cell phones." Does utilizing amateur radio really give them any benefit beyond what they can get without our help? If their event is low impact, or has fewer participants than the number of operators needed for effective communications, I'll probably suggest to them alternate communications options rather than utilizing our volunteers. As one of the more active counties in the state, I realize you each spend a lot of time representing ARES at the events we do. I respect the time each of you dedicate to our events, I appreciate your willingness to give of your time for our hobby as well as the people we serve.

Another question I ask is, "How does the group 'grow' by working on this event?" For the upcoming NDMS drill, one of the goals I set was to utilize the lowa Department of Public Health's HAN system for the primary communication link. The thought behind this is that in a real-world scenario, we may indeed be activated to augment staffing at local hospitals by providing communicators rather than communications equip ment. This drill will give us the opportunity to utilize different hardware, but more importantly demonstrate our actual communications ability - not just our "toys."

The hope is that our professionalism within the hospital demonstrated by using "real hospital equipment" will strengthen our place within the hospital, and the service we provide will be recognized as a tangible benefit to the operation as a whole.

resident's Soapbox

Field Day

We had some lousy weather for Field Day, but we had a successful event. The number of attendees was up over last year and even with some lengthy down -time due to thunder storms, it looks like we made plenty of contacts -- good thing we had all those CW guys! I was glad to see that everyone followed along with the safety protocols, especially with respect to lightning. We did have a nearmiss with the small tower when the cable used to raise the tower sections snapped. The beam itself only fell a couple of feet and was rapidly bent back into operational shape by our enterprising members. Although the tower and beam were quickly repaired and returned to service, it courtesy of the Iowa State Patrol still reminds us to respect the large, heavy mechanisms we're using. A ham that had recently been sitting directly underneath the main tower section on the tongue of the trailer narrowly missed getting, at the very least, a splitting headache. Be aware! The head you save

Club Services

Ask not what you can do for your club, but rather what can your club do for you? We've been asking that very same question in recent board meetings. What are the advantages to being a member of our club? What are the values received or perceived? We host a yearly hamfest, Field Day, Chili Feed & Auction, and the Christmas Party. You get informative, timely information on the club nets. The club repeater is kept in excellent repair. We strive to provide interesting and stimulating club meeting topics. If you attended the recent "Show & Shine" event, you likely saw the latest installations of in-car law enforcement technology and the City of Des Moines Police Department. And since it was hot, I know you all appreciated the ice-cream treats which were provided -- there were no left-overs! We do a lot, but we think there is more we could do, and we'd like to get your input. To that end, a couple of our board members are going to put together a survey to get an

idea of your satisfaction. We'll also be asking you what you'd like to see the club do. Please be reasonable and honest with your feedback. If you'd like to get involved with meetings or events, please let us know! I look forward to continued service with you.

Time to Eat?

Hungry and looking to meet local hams? On Fridays at the Buffet City on University (next to Toys R Us) a group of hams meet for lunch. This is an informal meeting and provides an excellent opportunity

to pass information while enjoying a nice selection of Chinese cuisine. The group (around 20) usually arrives around 11:45 and breaks up at about 1:00. All are welcome, including family members.

Caution! Considerable amount of amateur radio topics will be discussed.

There are several Polk
County ARES events
upcoming.

|Hams Will Love "Thunderstruck"

Submitted by Mark Campbell, WØGZR

Erik Larson is a remarkable writer and I've read several of his books. One particular book of amateur radio interest is "Thunderstruck." In it he chronicles the development of radio and alternately and deftly moves to a murder in London.

Radio characters include Guglielmo Marconi and Nikola Tesla. Marconi was a young man in 1896 and challenged many government officials. How could a 21-year old Italian-Irishman develop a device ahead of the best and the brightest Britain had to offer? In fact, British customs officers who were on the lookout for bombs that might harm the queen, destroyed Marconi's radio when he brought it to England.

Larson details Marconi's obsession with building bigger and better transmitters that could carry vast distances, even across the Atlantic Ocean. Radio enthusiasts will be astounded to learn the length and height of antennas. But what truly astounded me was the power he generated for the transmitters. In 1902, one of Marconi's sites used a 60 kW transmitter and four 210 -foot towers. And the power went higher in ensuing installations. He later admitted he could have used lower power and better antennas.

Larson details the Marconi's legal battles as well, including patent suits, his personal life and the threat of the Kaiser stealing his patent.

The story Larson weaves into Marconi's life is one of Hawley Harvey Crippen, an American medical man. It is a case of a mild-mannered, henpecked husband who dispatches his wife. His escape attempt brings the two stories together. As Crippen sails for Canada, radio telegraphy is put to work to capture him.

It is a great story made greater because it is true. If you have read Larson's "The Devil in the White City," you are already familiar with his fabulous writing and his attention to detail. That "Thunderstruck" involves the development of our hobby makes the book truly interesting.

THUNDERSTRUCK By Erik Larson. Illustrated. 463 pp. Crown Publishers

Ham Radio Basics - Technician Level License Class

Join the world of amateur radio and study with licensed Ham Radio instructors. You as an operator will learn the use of amateur radio equipment for enjoyment, experimentation and public service. Members of the Des Moines Radio Amateurs Association (DMRAA) will guide you through the requirements for obtaining the entry level Technician Class License. Official "Level 1 - Ham Radio License Manual" is required. Copies will be available at the first class for \$ 25.00. Ages 11+ Available through the Ankeny community Education.

Class Code = 101695 Thursday 9/11 - 11/20 7:00 - 9:00 pm No class on 10/16 Ankeny High School, room 1109 at 1155 SW Cherry Street, Ankeny, Iowa 50023

DMRAA Resumes Net

After a decades-long absence, the DMRAA has resumed a net. It's a combination of club announcements and ragchew format. While it is a DMRAA net, it is open to everyone, member or not. We use the W0AK club repeater, 146.940. Join us Saturday evenings at 7:30 p.m. We open with check-ins, then move to club announcements, then the ragchew begins. You may share your amateur radio activities, ask for assistance on a project, or list buy and sell items. Please join us on the net.

A Special Request from KØKDS

I am fundraising to support the athletes participating in Special Olympics of Iowa. SOIA serves athletes across Iowa from the Missouri River to the Mississippi River, and provides training and competitions in 23 Olympic-type sports. Almost 11,000 athletes SOIA events and competitions each year. I am supporting this organization to ensure SOIA athletes are afforded the opportunity to participate in competition that I feel is important to reach their full potential, enrich their lives, and be engaged in their communities, regardless of disability.

Not only will your donation support these athletes, but every dollar gets me closer to going Over the Edge on Wednesday, September 17, 2014, rappelling down the 26-story Financial Center in downtown Des Moines, the fourth-tallest building in Iowa. Reaching my \$1000 goal by September 1 will guarantee a rope time.

For more information or to make a secure donation online, visit http://www.kdsanders.com/overtheedge. All donations are tax-deductible!

Show & Shine 2014

PAGE 13

Show & Shine circa 1970

Rumor has it that the talented Tom Reis, NOVPR, could back this showpiece into the service station garage pictured at the tender age of 11 years old. Given the very utilitarian nature of this old truck, we suspect it was in fact many, many more years before he picked up any ladies rather than disabled vehicles. Be sure to ask Tom about this early prowess when you next see him!! The keen eye will also observe that he was accessing his near-HF privileges — that's a nice 11m whip mounted on the side.
